

Group:

Similoid – New world simulation scenario

An earthlike planet with life, but not intelligent, will be colonized with a group of 400 similoids. It will be a virtual simulation over 10,000 years - we can speed it up.

Assignment:

1. Set a goal that should be reached by 10,000 years. Think of things like infrastructure, a stable and advanced society, the possibility for them to develop beyond our level so they could solve our problems, or just to build a better world.

[]

2. Decide the one thing that would make them different from us. It could be something physical, mental, emotional.... .

[]

3. How do you think the change will work out?

[]

4. Decide if we can interfere and if so, how far we can go with that.

[]

Group:

Evaluation

- What will we see after 1,000 years?

[]

- What will we see after 5,000 years?

[]

- What will we see after 10,000 years?

[]

- What will be the impact of the change?

[]

- What are your overall conclusions?

[]
